1 Use Case Summary

The user classes identified the following use cases and primary actors for the NexusNotes Platform:

Primary Actor	Use Cases
Student	1. Upload Academic Resource 2. Search and Download Resource 3. View Tech-Trend Feed 4. Rate and Review Resource
Administrator	5. User Management 6. Content Moderation 7. System Monitoring

2 Detailed Use Cases

Use Case 1: Upload Academic Resource

Use Case ID:	UC-01
Use Case Name:	Upload Academic Resource
Created By:	Code Club
Date Created:	February 13, 2026
Actors:	Student
Description:	A student uploads a digital academic resource (lecture notes, project report, or question paper) to a specific subject repository for sharing with peers.
Preconditions:	1. Student is logged into NexusNotes. 2. Student has valid "Contributor" permissions.
Postconditions:	1. Resource is stored in the database. 2. Resource is indexed for search and categorization.
Normal Flow:	1.0 Upload Resource 1. Student navigates to the "Contribute" section. 2. System displays the upload form. 3. Student selects the Category (Lecture Notes, Question Bank, Project, Emerging Tech). 4. Student uploads the file (PDF, DOCX, PPT). 5. Student adds metadata (Subject, Topic, Tags). 6. Student submits the resource. 7. System validates file format and size. 8. System confirms successful upload and publishes content to the repository.
Alternative Flows:	UC-01.AC.1 Bulk Upload 1. Student selects "Bulk Upload" at step 1. 2. Student drags and drops multiple files. 3. System applies common metadata tags to all files.
Exceptions:	UC-01.EX.1 Invalid File Format 1. System detects unsupported file type. 2. System displays error message and requests valid format.
Priority:	High
Business Rules:	Maximum file size is 50MB per resource.

Use Case 2: Search and Download Resource

Use Case ID:	UC-02
Use Case Name:	Search and Download Resource
Created By:	Code Club
Date Created:	February 13, 2026
Actors:	Student
Description:	Students search for specific academic materials using keywords, filters (Subject, Module), or tags, and download them for study.
Preconditions:	Student is logged into NexusNotes.
Postconditions:	File is downloaded to the student's local device.
Normal Flow:	2.0 Standard Search 1. Student enters keywords in the global search bar. 2. System displays results ranked by relevance and user rating. 3. Student applies filters (e.g., "Computer Science", "Semester 1"). 4. System updates result list. 5. Student clicks on a resource to view details. 6. Student clicks "Download". 7. System increments the download count.
Alternative Flows:	UC-02.AC.1 Browse by Repository 1. Student navigates via menu: Repository → Year → Subject. 2. System lists all resources in that category.
Exceptions:	UC-02.EX.1 No Results 1. System finds no matches. 2. System suggests related topics or broader terms.
Priority:	Medium

Use Case 3: View Tech-Trend Feed

Use Case ID:	UC-03
Use Case Name:	View Tech-Trend Feed
Created By:	Code Club
Date Created:	February 13, 2026
Actors:	Student
Description:	Students access a real-time feed of technological advancements relevant to their academic domains to stay updated.
Preconditions:	Internet connection is active.
Postconditions:	Student views latest articles or news snippets.
Normal Flow:	3.0 View Feed 1. Student clicks on "Tech-Trend Feed" on the dashboard. 2. System fetches real-time data from external tech APIs/sources. 3. System displays curated list of trending technologies. 4. Student clicks on an article to read more.
Priority:	Medium

Use Case 4: Rate and Review Resource

Use Case ID:	UC-04
Use Case Name:	Rate and Review Resource
Created By:	Code Club
Date Created:	February 13, 2026
Actors:	Student
Description:	Students provide feedback and ratings on shared resources, helping to rank high-quality content.
Preconditions:	Student has downloaded or viewed the resource.
Postconditions:	Resource rating is updated in the database.
Normal Flow:	4.0 Submit Review 1. Student views resource details. 2. Student selects a star rating (1-5). 3. Student enters optional text comments. 4. Student submits review. 5. System recalculates average rating and displays new review.
Priority:	Low

Use Case 5: User Management (Admin)

Use Case ID:	UC-05
Use Case Name:	User Management
Created By:	Code Club
Date Created:	February 13, 2026
Actors:	Administrator
Description:	Administrator controls user roles, permissions, and access to the system.
Preconditions:	Admin is logged in with administrative privileges.
Postconditions:	User account is updated (created, suspended, or role-changed).
Normal Flow:	5.0 Manage Users 1. Admin navigates to "User Management" console. 2. Admin searches for a specific student or user. 3. Admin selects user account. 4. Admin updates permissions (e.g., suspend abusive user, promote to moderator). 5. System saves changes and notifies user if necessary.
Priority:	High

Use Case 6: Content Moderation (Admin)

Use Case ID:	UC-06
Use Case Name:	Content Moderation
Created By:	Code Club
Date Created:	February 13, 2026
Actors:	Administrator
Description:	Administrator monitors uploaded content and removes inappropriate, duplicate, or incorrect materials.
Preconditions:	Content has been flagged or requires review.
Postconditions:	Content is removed or marked as safe.
Normal Flow:	6.0 Moderation 1. Admin accesses "Moderation Queue" or views reported content. 2. System displays flagged resources. 3. Admin reviews content against community guidelines. 4. Admin deletes content or dismisses report. 5. System updates content visibility.
Priority:	High
